Federation, Phase 1 milestone, and abbreviation table.

4. Feature Acronym Column — Added `Code` column to the entire RBAC Feature-to-Role Mapping table (8.6.1) with 44 unique feature codes (MAP_NAV, DET_CLASS, AGENT_CORR, etc.). Added MAP_LAYERS row for layer visibility.

5. JWT/KeyCloak Architecture — Updated 8.6.2 to clarify KeyCloak Protocol Mappers embed feature permission codes directly in JWT. Updated 8.7 Integration List for KeyCloak. Updated FR63-FR64 to reference feature codes and Protocol Mappers.

6. GeoServer OGC Abstraction — Added principle to 6.1.1, new Section 8.9.3 (GeoServer OGC Abstraction), updated 8.7 GeoServer row, added Geospatial Data Loading Module to Phase 4. Added point 6 to "What Makes This Special."

7. Layer Visibility Control — Added MVP capability #23, FR13-FR15 (tree via GetCapabilities, checkboxes, z-order), RBAC row (MAP_LAYERS), added to Journey Requirements Summary, Phase 1 timetable, and deferred table updated.

8. Fusion → Correlation — Replaced throughout: "Fusion Agent" → "Correlation Agent", "semantic fusion" → "semantic correlation", "fused targets" → "correlated targets", "multi-INT fusion" → "multi-INT correlation". Module Federation kept unchanged.

9. RoE Agent → External Party — Removed as our development; MVP #12 → "RoE Evaluation Interface (external partner integration)". Added RoE Evaluator to Partner Integration Requirements (6.5), Integration List (8.7), risk mitigations. Updated Journey 6, kill chain FRs (FR45-FR46), and FR85. Updated all partner lists to include "RoE evaluator."

FR count: 87 FRs (was 83). **MVP capabilities:** 23 (was 22).

/bmad help : great . i want to continue to the next level , but still be able to adjust the PRD in the process . what is the next step
